UPCOMING EVENTS

Club Meeting: 6 April 2010,
The Cloud 9, 7 pm.

May 15-16 – Cheyenne Gem &
Mineral Club's Gem Show

June 12 – Kid's Day at the Old
West Museum

July 10-11 Cheyenne GPAA's
Annual Outing, Douglas Creek

October 23 – Ghost of the
West at the Old West Museum

March Minutes

Ken Siders called the meeting to order at 7:05 pm. All club officers and Board members were present except George Stumpf. There were a total of 39 in attendance. The February meeting minutes were approved, and Treasurer's Report given (\$4,677.50 in club account). Visitors /Guests were introduced and welcomed.

Ken Siders and Don Ashley are back from their trip to Phoenix and Stanton. They haven't had time to go through all their notes and prepare a presentation yet, so that will be forthcoming. They did share some general info, and Don purchased raffle tickets from the PLP at the Phoenix Gold Show with money donated by our club to the PLP. As a result, the club has won a Mountain Goat trommel...valued at \$695.00!

Another thing Ken brought back from the meetings in Stanton was the importance of having emergency health information available when prospecting. Members are encouraged to have this information either on their person or in their vehicle at all times when out in the field. Any medical conditions, allergies, prescriptions being taken, and any other pertinent health information should be included. In addition, emergency contact information should be provided. Keeping this information in your wallet, purse, or glove box could save your life!

The folks who make the Gold Grabber were also at Stanton, and they donated several of their new Gold Grabber Gold Pans to the club. Ken showed one and gave a brief talk about how to use it. We will be raffling some of these off at future meetings.

Speaking of health, Carl Filter was back at the meeting after having a round of problems as reported in the last newsletter. He was very thankful for the donation, and he gave the club a nice thank you card. Good to have you back

Carl!

Kristen Ruck from the Old West Museum will be at the April Meeting to talk about the events that are held at the museum. The club traditionally sets up a booth and provides gold panning demos at 2 of these events.

A collection was taken for PLP, \$46.00 was collected.

There being no further business to discuss, the business meeting was adjourned.

End

"CHUCK'S GOLD TRAPPER"™
 REVOLUTIONARY HAND DREDGE
 As seen on the Outdoor Channel "Gold Fever" film 81GF

This sand pump actually really works. It has a diaphragm check valve built into the bottom cap. This allows you to suck gold and sand from under a rock in a stream and transport it to your bucket or sluice without losing any of your sample. It will suck sample out of a three foot deep hole and not lose any of your gold. I also have a crevice tool that goes on the end of the "Gold Trapper" and extends it a little over a foot to let you suck out cracks in bedrock or work your way through big rocks in the bottom of a hole.

100% satisfaction guaranteed or your money back.
 I will guarantee the workmanship and materials of the "GOLD TRAPPER", when used under normal use, for a year.

"Gold Trapper" with Crevice Tool/Extension.....\$75.00
 Shipping in US.....Free
 Canadian shipping \$15.00 extra.....\$75.00

Key Policy Committee Approves Refunds for Gold Miners

Aanestad Legislation Provides Fairness for Suction Dredge Mining Industry

SACRAMENTO: Refund legislation authored by Senator Sam Aanestad (R-Grass Valley) passed its first key committee test today in the Senate Committee on Natural Resources and Water. SB 889 will allow Suction Dredge Miners to request a refund of suction dredge mining permits that were purchased from the California Department of Fish and Game (DFG) in 2009.

Senator Aanestad says the refund legislation represents an issue of fairness. Thousands of miners followed the letter of the law by purchasing permits in 2009 that would allow them to practice suction dredge mining – a practice that was later banned during the same year by the State Legislature.

"The miners requesting these refunds should not be blamed for the legislative action that essentially pulled the rug out from underneath their industry," said Senator Aanestad following today's committee hearing. "I'd like to thank committee members for understanding that these miners paid for a full year of mining activities and they didn't get it. They deserve a full refund. SB 889 clears the path toward a full refund."

According to statistics from the DFG website, nearly 4,000 suction dredge mining permits were purchased in 2009. More than 3,000 of the permits were purchased by California residents alone. The cost of a permit for California residents is \$47.50, and for out of state miners the permit fee is \$186.75. In 2009, the Department collected about \$250,000 from miners who were subsequently denied the right to mine.

The ban on suction dredge mining took place in early August, following the successful passage of SB 670. It had an immediate impact on Senator Aanestad's Northern California District.

"The busy season for suction dredge mining in California runs between the key months of May through October," said Senator Aanestad. "When the State Legislature banned this activity, the miners vanished. They didn't buy fuel in Northern California. They didn't buy food. They didn't stay in local hotels. They didn't rent equipment. The loss of this one industry represented a \$60 million hit to the Northern California economy and lost jobs."

The Senate Natural Resources Committee also took action today to pass a related measure authored by Senator Aanestad – SB 1103. This measure addresses the fee inequity that exists between surface mining operations that are classified as "active" and others classified as "idle."

"All 'active' and 'idle' mines in California are charged an annual fee that ranges from \$3400 to \$4700," said Senator Aanestad. "However, current law states that active mines that produce less than \$100,000 can apply for a 'low gross exemption' from this fee, but idle mines cannot. SB 1103 corrects this inequity."

RADIO STATIONS: .mp3 format sound bites are available from today's testimony during the Senate Natural Resources Committee hearing. Sound and scripts to follow.

TV & PRINT MEDIA: If you also desire .mp3 format sound from today's hearing, please contact me at the number above or via email. I will be happy to forward them to you.
